

Dear Shareholders,

It is my intent to release a monthly update to help keep you and prospective investors up-to-date with the developments of the company.

***Recent Acquisition***, I couldn't be more excited about the acquisition of the Suncliff brand. As the industry grows into the mainstream spotlight, I'm confident Suncliff and its lifestyle approach will be a runaway success. The vast majority of the industry is catering to very specific demographics in the space while Suncliff has created a broad range of experience-based products and recipes to help consumers new and old enhance their cannabis experience. Most new consumers of cannabis don't realize that there are a wide range of experiences to be had from the various plants, those experiences are directly correlated to the terpene profile found in each plant. These variations in profile are what create different strains/experiences (very similar to tannins in wine).

With Suncliff we now have trademarked brands and proprietary recipes that will give consumers the control they need over their individual experience. Each product falls within four categories; calm, creative, social or energetic. No longer will the customer have to guess the effects of each individual strain or dig through cannabis websites to gather half-baked information from sources like Leafly and Weedmaps. As we expand we are confident the quality of branding and packaging combined with the unique personal experience gives us a powerful competitive advantage when seeking partners in new markets worldwide. A footnote to this acquisition that has significant impact on our company is the fact that we acquired a comprehensive package of assets with the Suncliff deal. These include nearly \$100k in packaging and retail displays, 8 greenhouses, and enough supplies and equipment to set up an additional tier 3 (30k square feet of grow canopy) to be leased at a premium to a licensed facility on our farm in Washington State.

#### ***Filings/Compliance***

For many of you this process may feel like it's moving slowly, but I want to remind everyone that WSHE has been around for nearly 20 years and we are reconciling books & records in both Canada and the United States. We have completed our corporate services application with the OTC markets and with the recent approval I now have full access to our corporate profile on the OTC IQ. I have been methodically updating that information with the support of our team as it becomes available and we have a very clear path to removing the CE as well as reestablishing a fully reporting status. Each day we move a couple steps closer to completing this process, which will open the door for us to properly market ourselves and our objectives without risk of delaying our compliance review.

Lastly,

We have updated our website [www.greenlinkholdings.com](http://www.greenlinkholdings.com), and we will slowly migrate away from the E debit Global website over the coming months. We will frequently update the corporate team and bios as we expand our leadership to take on the increased workload that comes with rapid expansion and development.

I want to extend a sincere thank you to all of you who have joined us on this journey and I look forward to a bright future together!

Sincerely,

*Jake George*
